DECTRIS

SPECIFIC SOLUTIONS

X-ray detection without limits

Could your experiments benefit from an X-ray detector designed for your needs?

Unleash the full potential of your experiments with Specific Solutions: customized detector systems from DECTRIS!

In close collaboration with our highly motivated team, you can realize your idea for a specific-solution detector based on DECTRIS' standard hybrid-pixel, photon-counting technology platforms: PILATUS4 and EIGER2 pixel detectors.

- Custom geometries
- In-vacuum detectors
- Removable window

Check out our website for examples of solutions we have previously designed for our customers. Please contact **lisa.glatt@dectris.com** if you are interested in a customized DECTRIS detector.
